SUMMARY

Junior Full Stack Django Developer with hands-on experience building responsive web applications and e-commerce systems using Django, SQLite, JavaScript, AJAX, and React. Passionate about backend development, problem solving, and creating clean user-focused applications. Currently expanding skills in modern web technologies and seeking opportunities to grow as a software developer.

SKILLS

Backend (Django • Django REST Framework • SQLite) | **Frontend** (React • JavaScript • AJAX • HTML / CSS • Tailwind CSS) | **Tools & Others** (Canva • Microsoft Word • Microsoft Excel) | **Soft Skills** (Problem Solving • Teamwork • Communication • Time Management • Adaptability)

PROJECTS

Supplement E-commerce Website , Django • AJAX • SQLite • JavaScript • Tailwind

Built a full-featured e-commerce web application with product filtering, cart management, wishlist, authentication, checkout system, user dashboard, and responsive design. Implemented AJAX-based pagination and dynamic cart updates to improve user experience.

Learn2Drive— Driving Academy Platform ,

Django REST Framework • Simple JWT • SQLite • React.js • Axios • Tailwind

A full-stack web platform for driving academies that allows users to browse academies, book driving courses with trainers, and manage schedules. Academies can manage their profiles, trainers, and courses through a dedicated dashboard.

Gym Management System, Django • SQLite • Django Admin • Python

Developed a gym management system to handle member registration, subscription plans, and attendance tracking. Implemented automated subscription expiry handling and member status updates. Used Django admin panel as the main interface for managing data efficiently and simplifying operations.

chatflow, Django REST Framework • SQLite • Simple JWT • React • Tailwind CSS

Developed a real-time chat application that allows users to connect, chat with friends, and manage personal profiles. Implemented a full authentication system including user registration, login, and profile management. Focused on clean UI/UX and smooth communication between frontend and backend.

EDUCATION

Business Information System (BIS) / Capital University, GPA: 3.85

CERTIFICATES

Python Essentials – Cisco Networking Academy (Completed a Python programming course covering fundamentals such as variables, data structures, control flow, functions, and basic problem-solving using Python.) | **Oracle Cloud Infrastructure Certified Foundations Associate**  (Oracle Cloud Infrastructure 2026 Foundations Associate certification.)
